Lang.id This tool allows you to quickly and easily translate text into any language. The translation is done automatically and you can even select the text from an image. The program can be used to translate texts, user help, web sites, news and so on. The Lang.id also includes an interpreter that allows you to save the text that you've translated to your hard drive. Language for.NET 2.0 helps you translate text from one language to any other language. It does exactly the same task as Translate Software. But language for.NET is more simple and easy to use than other programs. Languages supported by this software are English, German, French, Russian, Arabic, Spanish, Italian,.NET, Korean, Chinese, Japanese, Dutch, Norwegian, Persian, and Portuguese. To use this software simply copy the.NET language file to your local.NET folder. Run Language for.NET or click "Install" to the program. You will see the window like the following. First you choose a language in the list. Language for.NET does not require restart of.NET for each translation. It uses a temp. language file to make it work. You need to unselect the languages you don't use after the translation is finished. (Policy)policy.clone(); if (config == null) { config = policy; } newPolicy = (JPopupPolicy)config; } else if (policy instanceof JPopupPolicy) { newPolicy = new JPopupPolicy((JPopupPolicy)policy); } if (schema == null) { // Derived schemas can implement their own schema class, or they // can implement Policy.schemaClass() schema = newPolicy.schemaClass(); } } } if (newPolicy instanceof JPopupPolicy) { // JPopupPolicy#setLayoutFile can't be overridden and allow // developers to provide a GUI

IPHONE 5 Launched last year with just one phone, Apple's redesigned iPhone finally made its debut yesterday with a swank new design that's out to impress. Unfortunately, as expected, Apple didn't unveil any new hardware. The new iPhone 5 sports a 4-inch Retina display, Apple's new A6 chip, an 8MP rear camera and a 1.2MP FaceTime HD front camera. Other than that, however, there's little to distinguish the iPhone 5 from last year's iPhone 4S model. Apple is hoping that with a new design and more streamlined operating system, iPhone 5 will bring its sales to a new high. Apple sold 3 million iPhone 4S units during last holiday quarter. A new iPhone 5 is expected to sell 3.5 million units this quarter, putting Apple's earnings comfortably ahead of those of its chief rival, Samsung. Under the hood, Apple packs a quad-core processor, the A6, with two gigabytes of memory, both improvements over the previous iPhone's A5. There's also Apple's first 64-bit chipset 6d1f23a050
